

My Vision for the Future of Coney Island

My vision for the future of Coney Island would be many changes. I would start with designing the buildings and making wider streets. For the buildings I would make them a nice white and red stones with lots of windows for people to view Coney Island. For the streets they would be the old fashion concrete that everyone is familiar with.

I also would make sure the neighborhood had beautiful homes for people to live and enjoy the view of Coney Island. I would make jobs available in the area to help families that need a job. On every corner there would be a working payphone, so that people do not have to walk miles and miles just to make calls. There would also be emergency housing for anyone that is lost or needs help pronto.

Two Firehouses would be built to best serve the residents of Coney Island. Detention Center would be built for all criminals that break the law. A movie theatre would be built with sixteen movies for the residents in the area. A hotel would be built for tourists to visit Astroland and enjoy the Coney Island area. There will be a rolling skating and an ice-skating ring built together for everyone to have fun. I would also, build different cultural restaurants. I would build a large library with several computers.

For kids that have parents that can't afford medical care I will build a free clinic for families that need help. Make a strict rule for all school age children through High School to wear uniforms. This way poor kids feel comfortable attending school that can't afford clothes. Private schools and colleges wouldn't be expensive for families to have their kids attend them. They would be based on the families income and the kids grades. An educational center would be built to help people to further their education and get their GED.

Even poor families in Coney Island would have an amazing house to live in. If they couldn't afford it the city would pay their rent for one year, until the family could get back on their feet. I would have different fund raisers to donate money for schools and take kids on trips.

For Astroland. Instead of tearing it down I would simply re-model it. The cyclone is the most important part of Astroland that has been here for years. So that would just be fixed up and then left alone. For the rest of Astroland I would make the rides more fun to ride. Also, make new and improved sections for every age to have fun. Inside the theme parks I would have more food stands, games, candy stands and just full of fun. There also, would be another roller coaster and a inside water park. The Astroland park would be open all year so that people can enjoy it whether it is cold or not.

I think that there is too much violence in Coney Island between people so I would also change that. To change this I would make sure that everyone talked out everything and that the city had meetings to make sure that every problem was resolved. Another problem that needs to be stopped is the drug use between the teenagers. If these two problems are not resolved many people can get hurt and nobody wants that especially not me. So Let's Stop The Violence and let's have change.

This is my vision for the future of Coney Island a nicer and cleaner neighborhood for people live in .
